"We will walk on our own feet; we will work with our own hands; we will speak our own minds ..."

Of compost and building a healthy soil

Springtime rambling, from a Yooper farmer's perspective by James Niemela

As I write this, on the first day of May, the snow is gently falling outside. But it's just fine; our little plants are inside the comfy greenhouse. While I'm looking forward to the weather turning sunny to warm up the soils and dry things out a bit after the 2-inches plus of rain we got since mid-week this past week, and while I long for warmer weather, I am comforted by God's promise in [Genesis 8:22](#):

"While the earth remaineth, seedtime and harvest, and cold and heat, and summer and winter, and day and night shall not cease."

Unless Jesus returns in glory to take His own to those eternal habitations in the heavens, summer WILL come this year. And, being a farmer and needing good weather to grow crops, although the weather is challenging at times, and I don't understand how it all works out sometimes, it does work out.

God promises to take care of His own, and He will, through the mountains and the valleys. I can trust Him on that, not because I feel it or understand it, but because HE said it. :)

This week, I want to talk about building soils without purchasing lots of exogenous inputs. If you have a little piece of land somewhere, you can garden, whether your pocketbook is thick, or more meager. It isn't necessary to buy a lot of expensive fertilizers.

If you feed the soil life, they will in turn feed your plants, and the plants in turn will feed you. How do you feed the soil life?

Well, they like to digest organic materials, basically anything that was once alive. Leaves, lawn clippings, vegetable trimmings, farm animal manure, fish scraps, dead squirrels, and so on.

The microscopic soil critters digest those goodies, and through their life processes, they create fertile soil. I'm not a soil scientist, so I don't understand exactly how it happens, but I know it does. I see the results of it in our soils.

One old farmer from California explains that there is a tide in the soil, the bacteria swim against the tide, and when they get old and tired, they run out of strength, get dragged along with it, bump against the plant hair roots, and burst, with their juices then being assimilated by the plant.

He explains that the plant produces sugars, and about a third of those sugars go toward the growth of the plant structure, the second third goes to form the plant fruit or seed babies for next year, and the remaining third is pumped into the ground to stimulate the soil organisms.

He says the plant basically [farms the soil life](#), like we farm chickens.

Another friend of mine explains it as the plant roots basically having a "glove" of soil microorganisms, and those little critters can break down nutrients for the plant to utilize in it's growth.

Those are interesting concepts; however, it works out exactly, feeding organic materials to the soil beasties does build fertility. And why wouldn't it, since that's how God designed it to work?

When you go out into the undisturbed forest, you will see how the leaves fall, then they start to rot down, and the forest fertility will increase over time.

In the fields, left uncut and unbaled, the hay stems will fall over in the fall and winter, lodge, get packed down by the snow, and begin the process of rotting down. That's how soil is "fertilized" in the natural world, and we can mimic that way, while respecting the design of Creation, by using organic materials to fertilize our gardens.

If you focus on feeding the soil life, and don't blow your money on bagged commercial fertilizer that actually will, over time, have a deleterious effect on the soil life, you will see your soils stabilize and remain fertile, even though you are taking nutrients off them in the form of the food you eat.

This is already going a little long, so I'll wind down here, and I'll talk next time about more nuts and bolts of how to use these materials, also mention a couple fertilizers/inputs that you can purchase if you're able, that will help "jumpstart" your soils until they are up to par.

Now, I need to get ready to head back into the greenhouse, time for another flush of planting!

Meetings are Mondays at 7:00pm

NARA Chalet in Houghton

Monday May 8, 7:00pm : Jim Goodall will give a presentation on creating an air-conditioning unit using ground water.

SECRETARY'S NOTE FOR MAY 2023

By Mary Sears

Dear Patriots,

I had a dream last night that it was spring in the UP. The birds were migrating in, the scent of hyacinth drifted lightly in the air, and the last visage of snow, hidden in the cool regions of the woods, were endlessly dripping their way to extinction...

No. Wait...

That was just last week!

Who ordered all this snow and why was it dropped off at my house?!

It seems that there has been a stream of strange weather patterns not only across the United States but all over the world. What could be causing these weather changes? The technocrats, that have a stranglehold over our media outlets, would like you to think it is manmade climate change and we should forgo heat from filthy fossil fuels in order to save the planet.

What Germany? You had a problem with burning your furniture this winter to stay warm? Sorry to hear that. You know the US had to blow up the Nord Stream Pipeline or we would all be speaking Russian by now! Thanks for your understanding.

On another note, why is the weather so strange?

The sun goes through patterns of activity that intensifies or subdues over an 11-year cycle. When the sun has extended periods of low activity, or the peaks and valleys of activity are not as intense as what they should be, and this continues over many years that is called a Solar Minimum. When it happens for decades, it is called a Grand Solar Minimum.

According to Earthsky.org:

"Grand Solar Minima happen when the peaks of several solar cycles in a row show less than average intensity. Quiet times on the sun have been known to extend for decades or even centuries. Solar cycles still occur during these periods. But they are at a lower intensity than usual.

The best-known Grand Solar Minimum was the [Maunder Minimum](#) of 1645-1715. During that time, the sun was largely devoid of any sunspots."

So, are we going into a GSM? The short answer from at least this researcher is no, though others are not quite as convinced.

Then what else could be causing our troubles?

How about volcano activity?

Did you know that there is volcanic activity and eruptions that happen on a daily basis? There are sites dedicated to watching them. [Volcanodiscovery.com](#) is a great site to see daily updates and a map of who is blowing off today.

Recently, however, we had two rather large volcano eruptions that left their plumes high in the atmosphere. The Janu-

ary 15, 2022, underwater eruption of the [Hunga Tonga](#) volcano was stated to have released 1000 times more energy than the Hiroshima bomb.

Plumes from the blast reached high into the stratosphere.

The lasting effects of this eruption will be felt by cooling due to ash in debris which remain in the southern jet stream.

♦ FOR THE NORTHERN HEMISPHERE WE HAVE THE SHIVELUCH ON THE [KAMCHATKA PENINSULA](#) WHICH IS THE RUSSIANS LARGEST VOLCANO. THIS APRIL 11TH ERUPTION WAS THE WORST OF THE PAST 60 YEARS, SPEWING DUST MORE THAN 6 MILES INTO THE AIR. VILLAGES MORE THAN 30 MILES AWAY WERE BLANKETED IN ALMOST 8 INCHES OF ASH.

I guess I'll take the snow. Of which we should have more of if we have anymore volcanoes dump their pay load into the stratosphere. Volcanic Winter anyone?

How about weather modification?

This has been a military complex dream for decades and money has been diverted to this cause since WWII.

We know the simple things like seeding to help farmers overcome drought. Or the crazy machines that can make a rain clouds. But what about a more serious (sinister) manipulation of weather? Does our government, or worse those with a lot of money, who choose to work together to create their utopia on earth, have the means to manipulate weather?

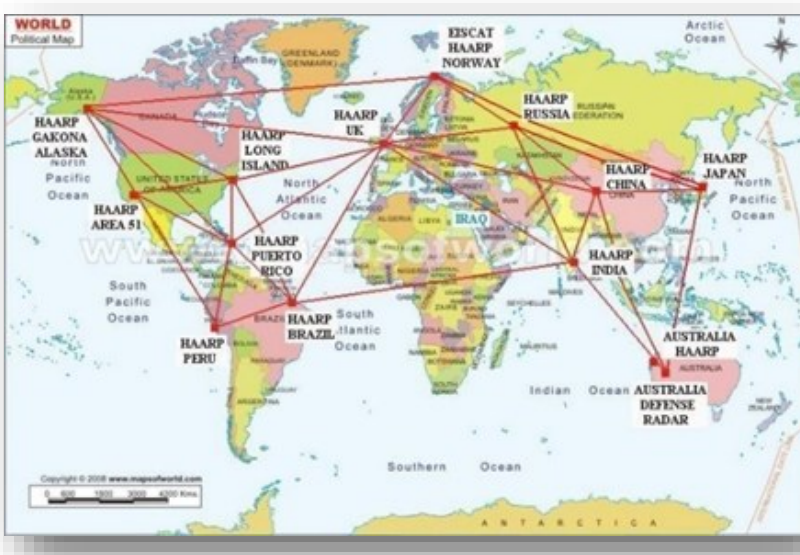

Heard of [HAARP](#)?

The closest HAARP to the UP was a US Navy research tool, the one in Alaska was handed over to the University of Alaska, Fairbanks in 2015.

From the <https://haarp.gi.alaska.edu/>

"The [High-frequency Active Auroral Research Program, or HAARP](#), is a scientific endeavor aimed at studying the properties and behavior of the ionosphere. "The ionosphere stretches roughly 50 to 400 miles above Earth's surface, right at the edge of space. Along with the neutral upper atmosphere, the ionosphere forms the boundary between Earth's lower atmosphere — where we live and breathe — and the vacuum of space." (NASA)"

Similar projects can be found around the world:

I'm sure they have our best interests at heart, and this can't in anyway harm us or disrupt normal weather patterns.

Nothing to fear there. LOL

So, what about chem trails? Can they change weather?

What?! You still don't believe they exist?

Imagine me rolling my eyes right now.

Please take 5 minutes and go to: <https://www.geoengineeringwatch.org/>

If you go on YouTube and try to look up chemtrails you will be met with a barrage of videos that spend their time convincing you that your government would never spray heavy metals, or other toxins into the air, butter wouldn't melt in their mouth. But I know for fact that there has been TED talks on how to reflect the sun and decrease "global warming" or other videos on how to give everyone the MRNA "vaccine" by aerosolizing it and spraying it from airplanes.

I know because I saw them.

Try to find those now. Scrubbed. Just like the Joan Rivers video in which she declares that Michelle Obama is a tranny. Poor Joan ended up dead a few weeks later. But I digress.

Personally, I believe that weather can be modified by man. Not through the simple daily living done by the average Joe but through mass manipulations of the great forces of nature. The powers that be would like you to harbor all the guilt over a changing earth caught up in the troughs of a corrupt sinful generation. Their imaginations have no limitations. Just as in the story of the Tower of Babel God said in Genesis 11:6

"And the LORD said, Behold, the people is one, and they have all one language; and this they begin to do: and now nothing will be restrained from them, which they have imagined to do."

They seek to control us through fear, and they will destroy the earth to get it.

But have heart.

God, our Father will never leave us and even if the days seem dark and the storms of life are ready to swallow you up, know that you are a child of the Most High God. Jesus comes and with him, your reward.

[Revelation 11:18](#) states:

*"And the nations were angry, and thy wrath is come, and the time of the dead, that they should be judged, and that thou shouldst give reward unto thy servants the prophets, and to the saints, and them that fear thy name, small and great; and **shouldst destroy them which destroy the earth.**"*

He knows who is destroying the earth. They can lie to us but NEVER to HIM.

The World Economic Forum Says It Will 'Accelerate' Implementation of Globalist [Agenda 2030](#).

by [Jake Welch](#) | April 26, 2023

World leaders will be gathering together later this year to “accelerate the implementation of Agenda 2030,” according to an [announcement](#) made by the unaccountable, corporate-led World Economic Forum (WEF) earlier this week.

The United Nations (UN) and the WEF appear frustrated by a lack of progress made towards their ‘[Great Reset](#)’ ideology, alongside Agenda 2030, the socialist, ideological [successor](#) to the failed “Millennium Development Goals”.

The WEF – led by German engineer Klaus Schwab, whose father once worked for the Nazi Party apparatus – has said previous efforts to implement their plans “suffered unforeseen setbacks due to the COVID-19 pandemic, major negative impacts of climate change, and the rising cost of food and fuel everywhere due to the conflict in Ukraine.”

Global leaders and representatives are, therefore, being summoned to “strategize” and expedite the progress of what the WEF refers to as “arguably the greatest-ever human endeavor undertaken to create peaceful, just, equal, and sustainable societies.”

The UN Department of Economic and Social Affairs has [argued](#) that “[p]ractical solutions that can accelerate progress on the [Sustainable Development Goals of the United Nations (SDGs)] will be urgently needed.”

The seventeen SDGs comprising Agenda 2030 were first compiled in 2015 and were agreed upon by [191 UN Member State](#) governments, though not necessarily their voting publics. These “goals” include laudable aspirations such as “ending poverty”, and eradicating world hunger, amongst more nefarious globalist goals in areas of gender ideology and hard-left socialist economics.

Since Davos 2021, the WEF has [publicly discussed](#) how these goals can be used to achieve the ‘Great Reset,’ which would see ordinary people able to own nothing personally. The WEF claims this will increase happiness in the world.

Civic Participation.

The WEF is focusing on something called “civic participation” to push its plans. They describe this as tackling “economic inequality, gender imbalances, corruption, and environmental degradation.”

“In the quest to build back better,” says the WEF, “civil society is proposing new ways of achieving the SDGs and creating a better post-pandemic world.”

What this will look like is something approximating communism, for a better world is one where “the benefits are evenly spread” because “development must be about [freedom from fear and freedom from want](#).”

This appears to be very much in line with the WEF’s agenda where everyone works together for the “[common good](#),” rather than aiming for profit or reward for hard work rendered or risks taken.

Halfway There.

The WEF plans to assemble world leaders after the highly-anticipated Sustainable Development Goals Progress Report is published by the Secretary-General of the UN, Antonio Guterres, later this year.

The report’s findings will inevitably lay the foundations for the international deliberations. “This year’s report,” insists the WEF, “is especially crucial as we’re nearing the halfway point of [Agenda 2030](#).”

Twitter's Disinformation Data Dumps Are Helpful—to a Point

Twitter has released 30 million tweets from state-sponsored disinformation accounts.

Researchers say the trove is useful, but they want more transparency. [BM—Before-Musk]

[Sara Harrison](#) | [Business](#) | Jul 7, 2019 7:00 AM

In October 2017, Twitter general counsel Sean Edgett faced difficult questions from the Senate Judiciary Committee about foreign interference in the 2016 election. Flanked by representatives from Facebook and Google, Edgett explained how Russia’s [Internet Research Agency](#) (IRA) had systematically spread fake news and stoked partisan sentiment through a carefully coordinated, years-long social media campaign.

A year later, Twitter [released](#) an archive of more than 10 million tweets, from 3,841 accounts it said were affiliated with the IRA, hoping to encourage “open research and investigation of these behaviors from researchers and academics.” The company has followed with additional data dumps, most recently last month when it [released](#) details of accounts linked to Russia, Iran, Venezuela, and the Catalan independence movement in Spain. All told, Twitter has shared more than 30 million tweets from accounts it says were “actively working to undermine” healthy discourse.

Researchers say the trove has been invaluable in learning about state-sponsored disinformation campaigns and how to combat them. Patrick Warren and Darren Linvill of Clemson University used the data to [identify](#) different kinds of troll behavior and examine how each contributed to the IRA campaign. “A lot of people have been using the data to try to come up with strategies to make our political conversation more robust,” Warren says. He points to a recent [Stanford report](#) that recommends regulating political ads, strengthening internal monitoring at social media companies, and standardizing labels for content linked to disinformation campaigns.

Still, there’s much missing from Twitter’s data dumps, and many unanswered questions about how impactful these accounts really were, how they operated, and how successful Twitter is at finding and shutting them down.

The data releases include the text of the tweets, the account names, number of people those accounts followed, the number of people who followed them, and how many times a tweet was liked and retweeted. But Twitter doesn’t release the names of accounts that followed or were followed by these state-sponsored profiles, to protect the privacy of those users. “The real thing that we don’t know is who saw these tweets?” says Cody Buntain, a postdoctoral researcher at NYU’s Social Media and Political Participation Lab. “That’s the critical piece of information that Twitter does not provide.”

Without those follower networks, Buntain and others say it’s hard to assess the impact of the accounts and how they grew and evolved over time. Did a bunch of fake accounts start following each other to give themselves the appearance of normalcy? Or did they start following specific people and grow their following organically? Researchers can’t say. With that information, “we could see what kind of content was the most engaging,” says Buntain. He says that information would also help us understand which niches of Twitter were targeted and how.

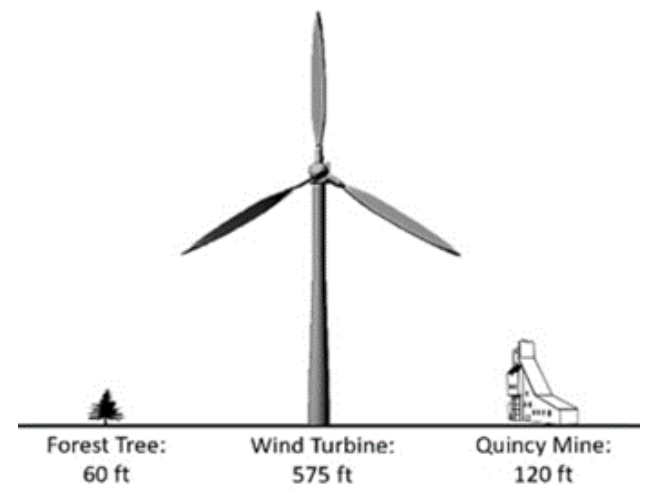

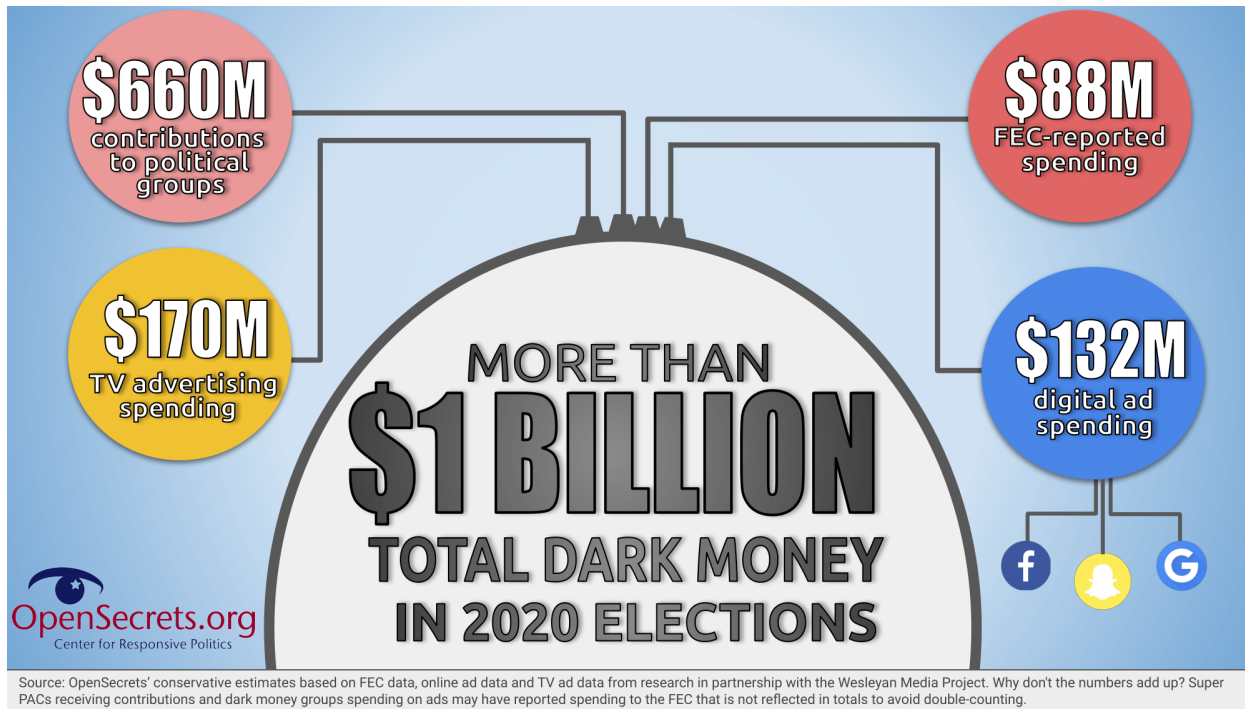

The follower networks are public while an account is working, but they disappear once Twitter shuts it down. Exposing those followers could subject users to abuse or harassment. “I can see why the platforms would be hesitant,” says Ben Nimmo, a senior fellow of the Atlantic Council’s Digital Forensic Research Lab. People who followed IRA or other state-sponsored accounts may have been manipulated, but they weren’t breaking the law or even violating Twitter’s terms of service.

Twitter would not reveal any specifics about its process for this article. “We seek to protect the integrity of our efforts and avoid giving bad actors too much information, but in general, we focus on conduct, rather than content,” the Twit-

ter spokesperson wrote in an emailed statement. “This means we look at the behavioral signals behind networks of accounts to intricately understand how they interact across the service,” the statement continued, adding that Twitter works with governments, law enforcement, and other tech companies to better understand such operations.

But in keeping those specifics secret, Twitter and other social media companies make oversight impossible and make themselves the sole arbiters of what kinds of speech are authentic and legitimate, says Danny O’Brien, director of strategy at the Electronic Frontier Foundation. The platforms decide who is normal, who is newsworthy, and who is dangerous, without revealing how they make those judgment calls. “From a social standpoint this puts a huge amount of faith and trust and responsibility in the platforms,” says Buntain.

In some ways, the operations Twitter has identified in Russia, Iran, and elsewhere are low-hanging fruit. It’s against Twitter’s [rules](#) to impersonate someone in order to intentionally “mislead, confuse, or deceive others.” It’s also straightforward to say one country shouldn’t mount a massive, covert disinformation campaign to manipulate another country’s voters. But the issues get more complex when you look at domestic social media campaigns. Is it wrong for a political action committee to hire marketing and PR firms to promote specific ideas on social media? Or for a private citizen to set up a web of blogs and posts that promote particular candidates or disparage others? “Is the problem that people are trying to influence one another? Because if it is, then you’re probably going to have to ban elections, because that’s the whole point of elections,” O’Brien says.

GUARDIANSOFTHEKEEWENAWRIDGE.ORG

Recent Case of Severe Microwave Syndrome Reveals Problems With 5G

One woman's recent illness highlights the issue of only considering radiofrequency radiation's thermal effects

By [David Charbonneau](#) | Apr 29 2023

After a 5G base station was installed within 60 meters of her second-floor apartment, a middle-aged, otherwise healthy, Swedish woman developed debilitating symptoms corresponding with radiofrequency (RF)/microwave syndrome, researchers at the Environment and Cancer Research Foundation (ECRF) in Sweden [reported](#) this month. This was the third such case the researchers had documented.

According to their case study, published in *Annals of Clinical and Medical Case Reports*, fifth generation (5G) wireless technology is being rolled out worldwide “despite no previous research on possible negative effects on human health and the environment.”

As a result, exposure to pulse-modulated microwave radiation has “increased dramatically on a world-wide basis.” Microwave radiation are frequencies in the range of 300 MHz to 300 GHz within the radiofrequency (RF) spectrum. In city environments, frequencies used for 5G are currently in the 3.5 GHz band.

Studies on possible health effects from exposure to 5G frequencies were all but non-existent until recently. In a [study published in October 2022](#), animals were exposed to the 5G frequency of 3.5 GHz for 2 hours a day, 5 days a week for one month. The exposure caused oxidative stress and an increase of degenerated neurons in the hippocampus region of the brain, in addition to decreased [irisin](#) levels, a hormone positively correlated with weight loss and healthy cognitive function.

In the case study, the woman quickly developed a large array of debilitating symptoms after the installation. These symptoms included headache, dizziness and balance problems, cognitive dysfunction—including memory, confusion and loss of focus—as well as extreme fatigue, anxiety, cough, nose bleeding, and disorders of urinary function and the skin, including spontaneous bruising and skin eruptions.

The 5G antenna was installed on the roof of a three-floor adjacent building and projected towards her apartment on the second floor. There was previously a 4G base station antenna at the same spot, but it was only after it was replaced by the 5G antenna that the woman quickly developed severe symptoms of microwave syndrome. The 4G antenna was removed shortly after the 5G deployment.

The woman reported that when she relocated to another apartment not near a 5G base station, all her symptoms quickly resolved, only to return

within 24 hours of her return to her own apartment.

The woman's dog also showed signs of ill health after the 5G installation. Reportedly, the dog contracted diarrhea soon after the 5G was installed. This disappeared during the retreat to the other apartment with no 5G but returned when they

moved back to her own apartment.

Also, the dog was reluctant to re-enter the apartment after being taken out for a walk.

The researchers point out that “5G emits high repetitive pulses of microwave radiation” with radiation spikes that are exponentially greater than those of previous generations, including 4G.

The researchers measured microwatts per square meter within one foot of the woman's living room window over the course of one minute, and found significant spikes.

High radiation was also found in the bathroom, highest in the bathtub closest to the window. Considerably lower RF radiation was measured in the bedroom which was not directly in the line of transmission from the base station.

Despite maxing out the commercial meter (Safe and Sound, Pro II) used by the researchers, the level of exposure was non-thermal and well below the guidelines recommended by the International Commission on Non-Ionizing Radiation (ICNIRP).

A History of Exposure Disorders

RF sickness or illness resulting from microwave exposure, was first [reported](#) in the 1960s and 1970s in East European countries. People most commonly suffered symptoms relating to neural, cardiovascular, and endocrine systems disruption.

International [investigations](#) of exposed workers, including American military personnel, showed that microwave exposure at non-thermal levels caused symptoms such as fatigue, dizziness, headache, sleep disorders, anxiety, and problems with attention and memory.

A [review](#) of multiple human and animal studies also concluded that “a surprisingly wide variety of neurological and physiological reactions are to be expected” because of exposure to non-thermal levels of RF/microwave radiation.

The condition has been variously termed radiofrequency sickness syndrome or microwave syndrome. The non-thermal effects—effects unrelated to a build-up of heat—depend primarily on the modulation and/or pulsation of the signal as well as on the peak and average intensity.

The Problem with Current RF Safety Standards

There are significant problems with how health effects from RF radiation are weighed, according to James Lin, a professor emeritus in the department of electrical and computer engineering at the University of Illinois Chicago.

In [an article](#) published in [Environmental Research in April, 2023](#), Lin details how safety limits for exposure to RF radiation applied by most countries around the world are still based on acute heat or thermal effects that appear within a short time from exposure, thus failing to assess other effects of long-term exposure.

The guidelines for reference values based on heating are set by the International Commission on Non-Ionizing Radiation Protection (ICNIRP), a self-appointed private organization based in Germany. ICNIRP has [positioned itself with industry support](#) to be the dominant international authority in the evaluation of scientific evidence of negative health effects from RF radiation.

“Their guidelines are based on evaluations that have rejected all scientific evidence on non-thermal effects, despite growing evidence of a range of harmful effects well below the ICNIRP levels. That unscientific evaluation is in the interest of industry thereby facilitating the deployment of 5G and the wireless society,” the researchers at ECRF wrote.

In his [recent Environmental Research article](#), Lin, a former long-time member of ICNIRP concluded, “There are substantial abnormalities in these putative health safety protection guidelines and standards. Some of the safety limits are irrelevant, debatable, and absent of scientific justification from the standpoint of safety and public health protection.”

In 2019, 258 EMF scientists from 58 countries [appealed](#) to the United Nations to impose a moratorium on the roll-out of 5G until health effects could be properly assessed.

In the appeal, the scientists said:

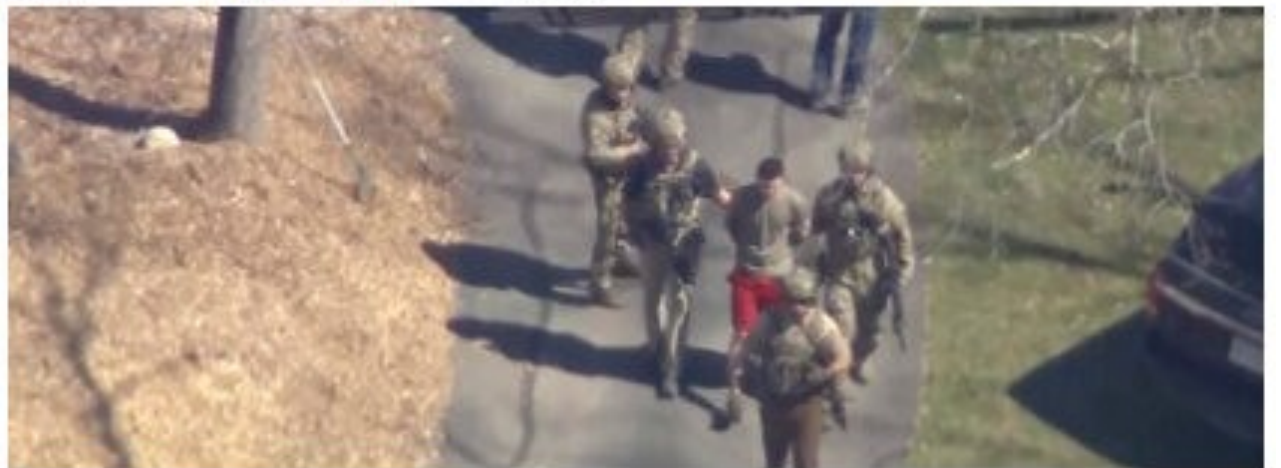

“Wireless communication technologies are rapidly becoming an integral part of every economic sector. But there is a rapidly growing body of scientific evidence of harm to people, plants, animals, and microbes caused by exposure to these technologies.

It is our opinion that adverse health consequences of chronic and involuntary exposure of people to non-ionizing electromagnetic field sources are being ignored by national and international health organizations despite our repeated inquiries as well as inquiries made by many other concerned scientists, medical doctors and advocates.

This constitutes a clear violation of human rights, as defined by the United Nations.”

Hamilton 68: A New Tool to Track Russian Disinformation on Twitter

Smallpox vaccine 'triggered Aids virus'

By Pearce Wright
Science Editor

The Aids epidemic may have been triggered by the mass vaccination campaign which eradicated smallpox.

The World Health Organization, which masterminded the 13-year campaign, is studying new scientific evidence suggesting that immunization with the smallpox vaccine *Vaccinia* awakened the unsuspected, dormant human immuno defence virus infection (HIV).

Some experts fear that in obliterating one disease, another disease was transformed from a minor endemic illness of the Third World into the current pandemic.

While doctors now accept that *Vaccinia* can activate other viruses, they are divided about whether it was the main catalyst to the Aids epidemic.

But an advisor to WHO who disclosed the problem, told *The Times*: "I thought it was just a coincidence until we studied the latest findings about the reactions which can be caused by *Vaccinia*. Now I believe the smallpox vaccine theory is the explanation to the explosion of Aids."

Further evidence comes from the Walter Reed Army Medical Centre in Washington.

While smallpox vaccine is no longer kept for public health purposes, new recruits to the American Armed services are immunized as a precaution against possible biological warfare. Routine vaccination of a 19-year-old recruit was the trigger for stimulation of dormant HIV virus into Aids.

This discovery of how people with sub-clinical HIV infection are at risk of rapid development of Aids as a vaccine-induced disease was made by a medical team working with Dr Robert Redfield at Walter Reed.

The recruit who developed Aids after vaccination had been healthy throughout high school. He was given multiple immunizations, followed by his first smallpox vaccination.

Two and a half weeks later he developed fever, headaches, neck stiffness and night sweats. Three weeks later he was admitted to Walter Reed suffering from meningitis and rapidly developed further symptoms of Aids and died after responding for a short time to treatment.

Aids epidemic 'triggered by smallpox vaccine'

Continued from page 1

modified versions of the smallpox vaccine to combat other diseases in developing countries.

Other doctors who accept the connection between the anti-smallpox campaign and the Aids epidemic now see answers to questions which had baffled them. How, for instance, the Aids organism, previously regarded by scientists as "weak, slow and vulnerable", began to behave like a type capable of creating a plague.

Many experts are reluctant to support the theory publicly because they believe it would be interpreted unfairly as criticism of WHO.

In addition, they are concerned about the impact on other public health campaigns with vaccines, such as against diphtheria and the continued use of *Vaccinia* in potential Aids research.

The coincidence between the anti-smallpox campaign and the rise of Aids was discussed privately last year by experts at WHO. The possibility was dismissed on grounds of unsatisfactory evidence.

Advisors to the organization believed then that too much attention was being focussed on Aids by the media. It is now felt that doubts would have risen sooner if public health authorities in Africa had more willingly reported infection statistics to WHO.

Instead, some African countries continued to ignore the existence of Aids even after US doctors alerted the world when the infection spread to the United States.

However, as epidemiologists gleaned more information about Aids from reluctant Central African countries, clues began to emerge from the new findings when examined against the wealth of detail known about smallpox as recorded in the *Final Report of the Global Commission for the Certification of Smallpox Eradication*.

The smallpox vaccine theory would account for the position of each of the seven Central African states which top the league table of most-afflicted countries; why Brazil became the most afflicted Latin American country; and how Haiti became the route for the spread of Aids to the US.

Needles were reused 40 to 60 times in the vaccination campaign. Waving the needle across a flame was the main, but perhaps not totally satisfactory method, of sterilisation.

Although no detailed figures are available, WHO information indicated that the Aids league table of Central Africa matches the concentration of vaccinations.

We know that the Covid 'vaccines' contain HIV, but it's not the first time they include it in vaccines 🙄

May 11, 1987, the London Times published an article titled "Smallpox vaccine causes the AIDS virus."

Almost 100 million Africans were vaccinated by the WHO. The vaccine was blamed for awakening the "dormant" infection of the AIDS virus on the continent.

Dr. Robert Gallo, one of the discoverers of HIV, told the Times: "Now I believe that the theory of the smallpox vaccine explains the explosion of AIDS, the link between the WHO program and the epidemic is an interesting and important hypothesis."

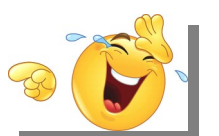

They are doing it again but this time with the entire world population.

MSM is already talking about getting tested for HIV. They want you to think you had it prior to the jab but unaware because you didn't get tested for it.

They will call it an AIDS epidemic when it's actually a VAIDS epidemic - Vaccine Acquired Immune Deficiency Syndrome.

<https://t.me/LauraAbolichannel>

My wife announced she is leaving me, due to my obsession with the 70s band The Monkees. At first I thought she was joking. But then I saw her face. – Andrew McKnight [For those who don't get it: I'm a Believer - The Monkees]

To Secede or Not to Secede; that is the Question

By Jim Hafeman

*Whether 'tis nobler in the mind to suffer
The slings and arrows of outrageous fortune,
Or to take arms against a sea of troubles,
And by opposing end them? Shakespeare*

The numerous atrocities and unprecedented overreach by the Democrats, there has never been more justification for the Boroughs of New York City to secede from the City. With seemingly above average IQs in Districts beyond those of Nadler and AOC, the boroughs stand an excellent chance of surviving at a much higher level, especially Staten Island.

The same applies to the Northern third of the State of California, who are suffering the Democrats' indifference when it comes to invoking any political wisdom. If that section of California could erect a fence on both the northern and southern border, they're prosperity would be boundless.

The discussion of the Upper Peninsula ceding from the State of Michigan is nothing new, but now we're 100-years too late. The monetary rewards of the UP's natural resources already found its way to Lansing and today the mined nickel and gold goes to Canadian interests.

The UP also has a notorious attachment to the Democratic Party despite the years of abuse and neglect, which makes secession a very bad idea from the governance standpoint.

- A MILITARY THAT INVADES & DESTROYS SOVEREIGN NATIONS FOR EMPIRE BUILDING!
- DESTROYS THE CULTURAL, ARTISTIC, INTELLECTUAL, & RELIGIOUS HERITAGE OF AMERICA! REPLACES IT WITH SATANISM!
- THE 2ND AMENDMENT IS ABOLISHED! AMERICANS LOSE THE ABILITY TO PROTECT THEMSELVES AND THEIR FAMILIES!!!

NATIONALISM
• LIFE, LIBERTY, & HAPPINESS FOR ALL PEOPLE!

- BASIC HUMAN RIGHTS FOR ALL! GUARANTEED BY THE CONSTITUTION!
- A BOOMING ECONOMY POWERED BY SMALL BUSINESS!
- NATIONAL UNITY & PRIDE WITH MUTUAL RESPECT BETWEEN ALL PEOPLE!
- POWERFULLY ENGINEERED MODERN CITIES & TOWNS WITH AN INFRASTRUCTURE THAT IS ALWAYS IMPROVING!
- THE OPPORTUNITY TO CLIMB THE SOCIAL ECONOMIC LADDER! - UPWARD MOBILITY!
- AN APPRECIATION FOR ALL HUMAN LIFE INCLUDING THOSE IN THE WOMB!
- FREEDOM OF SPEECH, THOUGHT AND EXPRESSION!
- A MILITARY THAT PROTECTS AMERICA INSTEAD OF EMPIRE BUILDING!
- PRESERVES THE CULTURAL, ARTISTIC, INTELLECTUAL, & RELIGIOUS HERITAGE OF AMERICA!
- THE RIGHT TO BEAR ARMS SO THAT WE CAN PROTECT OURSELVES AND OUR FAMILIES!!!

The citizens of the UP like minorities in cities are incapable of living in a nipple-free area; quenching needs on the government teat has put all of America in a globalists' septic tank of dependence and control.

What has become painfully evident is that a large majority of individuals elected by the citizens have sold-out to corporations, particularly pharmaceuticals, lobbyists, the military industrial complex and Big Tech. Add the money infused into leftists' politi-

cal agendas by wealthy supporters of projects like the Sixteen Thirty Fund, the 1619 Project, Critical race theory, sexual perverts' agenda, and testicles "lawfully" entering female athletics, and the citizens have little influence in political agendas.

So, the discussion of seceding is indeed very honorable and should be pursued, it also indicates our problems are deeper than the politicians' pockets.

Fajita Chicken Roll-Ups

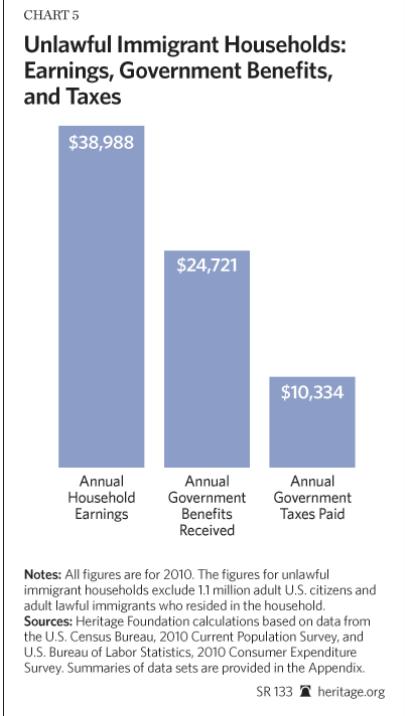

INGREDIENTS

- 2 TBSP. EXTRA VIRGIN OLIVE OIL
- 1 TSP. GROUND CUMIN
- 1/2 TSP. DRIED OREGANO
- 2 CLOVES GARLIC, VERY FINELY CHOPPED
- KOSHER SALT AND PEPPER
- 8 SMALL (2 OZ. EACH) CHICKEN CUTLETS, TRIMMED
- 1 EACH YELLOW AND RED BELL PEPPER, SLICED
- 2 TBSP. FRESH LIME JUICE
- 2 TSP. HONEY
- 1 5-OZ. PACKAGE MIXED GREENS
- 1/2 SEEDLESS CUCUMBER, CUT INTO HALF MOONS
- 1/4 C. (1 OZ.) FETA CHEESE

DIRECTIONS

- STEP 1:** Heat oven to 375°F. In a small bowl, whisk together 1 tablespoon oil, the cumin, oregano, half the garlic, and 1/4 teaspoon each salt and pepper.
- STEP 2:** Brush the chicken cutlets with the spice mixture. Divide the peppers among the cutlets, then roll up and secure tightly with wooden toothpicks or skewers.
- STEP 3:** Heat the remaining tablespoon oil in a large cast-iron skillet over medium heat. Add the chicken seam-side down and cook until golden brown, about two minutes. Turn and cook 1 minute more, then transfer to the oven and roast until the chicken is cooked through, 9 to 11 minutes.
- STEP 4:** Meanwhile, in a large bowl, whisk together the lime juice, honey, the remaining garlic, and a pinch of pepper. Toss with the greens, cucumber, and feta. Serve with the chicken.

Illegal immigration costs taxpayers \$113 billion per year.

U.S. Constitution 2nd Amendment

A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.

Luke 11:21
When a strong man armed keepeth his palace, his goods are in peace:

Luke 22:36
...he that hath no sword, let him sell his garment, and buy one.

In God We Trust

Michigan House Bill 4156 (2023)

A bill to enter into the agreement among the states to elect the President by national popular vote; and for related purposes. The people of the state of Michigan enact:

Sec. 1. This act may be cited as the "agreement among the states to elect the President by national popular vote".

Sec. 2. It is the public policy of this state that the one-person, one-vote principle requires that the candidate who receives the most votes nationwide should become President.

Sec. 3. The agreement among the states to elect the President by national popular vote is enacted into law and entered into with all jurisdictions legally joining in the agreement, in the form substantially as follows:

Agreement Among the States to Elect the President by National Popular Vote

EDITOR'S NOTE: *If they attach a 10-year felony and/or \$10,000 fine for each act that violates the integrity of the election by false vote or unregistered voter, great!*

Dear Friends of Integritas Community Health,

Thank you very much for your continued interest in Integritas.

The Board of Integritas Community Health, Inc. has decided to temporarily table this project. Reasons given include low attendance and lack of financial viability. At this time, a suitable physician candidate has not been located.

If you would have a suggestion or would like to assist with furthering this project, we are always open to listen. Please reach out to us via email at IntegritasCommunityHealth@proton.me

Going forward:

If you are a person of faith, please continue to pray for us!

If you have experience in the healthcare field or business, we'd love to hear your thoughts!

We are looking for a supervising family physician. If you know of a like-minded physician interested in starting an independent clinic, please reach out to us!

Please know that we will restart this endeavor should there be renewed interest, or a physician candidate identified. This is a temporary pause to assess the long terms goals and direction of this project. We recognize the need is still there and hope to work on finding suitable solutions for healthcare in UP.

Thank you again for your interest and support.

Sincerely,

Emily Timonen, Secretary

theVortex

Copper Island Academy which was born out of parental frustration with local school districts and their approval of Health Department mandates and threats of mandatory vaccination for children.

They have exploded on the scene with a Finish style education system that has left the public school in the

Korean Barley Tea (Bori Cha)

Roasted barley tea may be the most popular beverage in Korea. It's traditionally served both hot and cold in homes, in restaurants, and at other gatherings, either in place of water or alongside water, and many Koreans drink copious amounts of it each day.

It's known as *bori cha* (or sometimes *boricha*) in Korean. People in Japan and China also drink roasted barley tea. In Japan, it's known as *mugicha*, and in China, it's known as *dàmàichá* or *màichá*. You shouldn't confuse it with matcha tea, though; matcha is Japanese [green tea](#), not barley tea.

RECIPE

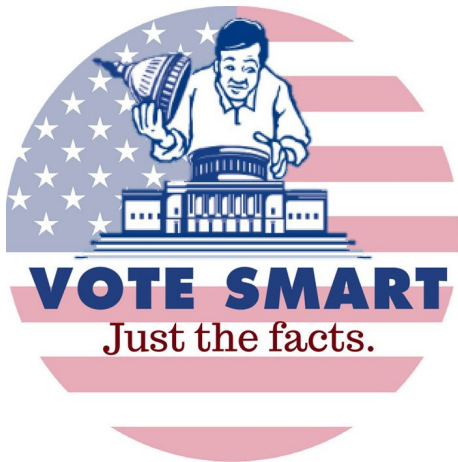

2 tablespoons roasted barley & 8 cups water

- Gather the ingredients.
- In a small pot, bring barley (in a tea strainer container) and water to a boil.
- Reduce to simmer, cover, and cook for 20 minutes.
- Remove the strainer with the barley in it and serve immediately or store in the refrigerator and serve cold.

Tip: If you cannot find the roasted barley, you can make your own by toasting barley in a sauté pan over medium heat for 5 to 10 minutes, or until the grains turn a dark brown color.

HUSKIES FOR AMERICA
NEWS
Copper Island Academy

**COPPER ISLAND
ACADEMY**

Dear Supporters of Huskies for America,

We have completed another successful semester at Michigan Tech. Those of you who could not attend the presentations of invited speakers in person, can watch recordings on the website of Huskies for America:

[Presentation by Brandon Tatum](#) (invited by the Turning Point USA Chapter)

[Presentation by Riley Gaines](#) (invited by the Young Americans for Freedom at MTU)

[Presentation by Bradley Matts](#) (invited by the Students for Life at MTU)

The Young Americans for Freedom students also invited Patrick Wood but his presentation is postponed to fall due to health-related problems of our visitor. However, you can find very interesting [interview with Patrick Wood](#), which took place on WMPL radio station and is also included on the website.

The students will leave campus in the next few days, and Huskies for America will take advantage of summer times. However, please feel free to stay in touch during the summer time. We welcome and visitors and any comments and suggestions, plus we will be happy to answer any question you might have.

We will likely start fundraising campaign some time this summer to raise funds for the next academic year.
